REMARKS

None of the references taken individually or in combination teach or suggest a computing system having an integrated group of data repositories which define an element of a graphical user interface. For example, Berger teaches an application based on the use of software applets with a master controlling applet which does not teach or suggest the data repository limitation. Further, Berger in combination with one or more of the references cited by the Examiner does not teach or suggest this limitation.

If any issue regarding the allowability of any of the pending claims in the present application could be readily resolved, or if other action could be taken to further advance this application such as an Examiner's amendment, or if the Examiner should have any questions regarding the present amendment, it is respectfully requested that the Examiner please telephone Applicant's undersigned attorney in this regard.

Respectfully submitted,
